The April 1, 2000 Population Estimates base reflects changes to the Census 2000 population from the Count Question Resolution program and geographic program revisions.

The original race data from Census 2000 are modified to reclassify the Some Other Race category. This modification is used for all Census Bureau estimates products and is explained in the document entitled "Modified Race Data Summary File Technical Documentation and ASCII Layout" that can be found on the Census Bureau website at http://www.census.gov/popest/research/modified.html.

The data source for April 1, 2010 is the 2010 Census count. The original race data from the 2010 Census are modified to reclassify the Some Other Race category. For more information see http://www.census.gov/popest/methodology/2000-2010_Intercensal_Estimates_Methodology.pdf.

The values for July 1, 2010 were produced by applying estimates of change in the population between April 1 and July 1 of 2010 to the 2010 Census counts. Further details on this methodology are available at http://www.census.gov/popest/methodology/2000-2010_Intercensal_Estimates_Methodology.pdf.
